REGINA, January 31, 1949.

HON. J. H. BROCKELBANK,
*Minister of Natural Resources
 and Industrial Development,*
 Saskatchewan Resources Building,
 Regina, Saskatchewan.

Dear Sir:

The Saskatchewan Power Commission submits herewith its Annual Report for the fiscal year which ended December 31, 1948. The certificate of the Auditor of Utilities is attached to this report.

A fourth rate reduction was made effective June 1, 1948. The four reductions referred to were made as follows:

First reduction May 1, 1945
 Second reduction June 1, 1946
 Third reduction July 1, 1947
 Fourth reduction June 1, 1948

During the period up to May 1, 1945, The Saskatchewan Power Commission had maximum rates as high as 15c per kilowatt hour. As of June 1, 1948, the maximum in any area had been reduced to 8c per kilowatt hour. Statistical data regarding kilowatt hour sales and revenues received follow and you will note that there was an increase of more than 10% in total kilowatt hours and retail sales increased more than 15% in kilowatt hours sold in 1948, as compared to 1947.

KILOWATT HOURS SOLD—

Wholesale to Cities:	1947	1948
Saskatoon	62,515,591	65,388,074
North Battleford	4,315,502	4,756,020
Swift Current	5,976,340	6,441,280
Retail to:		
Saskatchewan Power		
Commission Customers	67,782,420	78,126,705
	<u>140,589,853</u>	<u>154,712,079</u>

REVENUES RECEIVED FROM THE SALE OF KILOWATT HOURS SOLD—

Wholesale to Cities:	1947	1948
Saskatoon	\$ 719,662.33	\$ 800,550.00
*North Battleford	171,073.61	196,251.83
Swift Current	156,969.88	224,749.98

*Includes steam sold to City of North Battleford.

Retail to:

Saskatchewan Power		
Commission Customers	\$ 3,394,801.03	\$ 3,836,590.25
	<u>\$ 4,442,506.85</u>	<u>\$ 5,058,142.06</u>

The earned surplus of the Power Commission for the year 1948, after payment of interest, sinking fund charges and appropriation for Contingency Reserve, amounted to \$427,743.39. The accumulated surplus of the Power Commission to date amounts to \$1,400,219.41. The accumulated surplus for the four years 1945 to 1948 inclusive, amounts to \$1,631,636.08.

The revenue, operating costs, interest, sinking fund and reserve for contingencies and net profit for the year 1948 are shown in the following statement:

CONSOLIDATED PROFIT AND LOSS STATEMENT FOR THE YEAR 1948—

Total Revenue	\$ 5,058,142.06
Total Operating Costs	3,275,728.65
Operating Profit	1,782,413.41
Interest	705,089.54
Sinking Fund	471,466.97
Reserves for Contingencies	178,113.51
Net Profit	427,743.39

The following tabulation shows surplus or deficit for each year of the Commission's operation, together with the accumulated surplus or deficit.

Year	Loss for Year	Surplus for Year	Accumulated Deficit	Accumulated Surplus
1929	\$ 180.06		\$ 180.06	
1930	946.11		1,126.17	
1931	35,880.11		37,006.28	
1932	50,979.17		87,985.45	
1933	77,497.27		165,482.72	
1934	77,135.10		242,617.82	
1935	46,980.90		289,598.72	
1936	24,150.55		313,749.27	
1937	12,616.57		326,365.84	
1938	570.20		326,936.04	
1939		\$ 7,499.51	319,436.53	
1940		3,386.93	316,049.60	
1941		12,945.08	303,104.52	
1942		16,746.61	286,357.91	
1943		22,462.87	263,895.04	
1944		32,477.37	231,417.67	
1945		156,835.15	74,582.52	
1946		414,282.64		\$ 339,700.12
1947		632,774.90		972,475.02
1948		427,743.39		1,400,218.41

METERS IN SERVICE—

Meters in service increased during the year 1948 by 6,150. This represents service extensions constructed by the Commission during the year to serve new customers. This is the largest number of services extended to new customers in any one year during the history of the Commission, including the years which covered the Commission's initial construction programme. The total number of meters in service as of December 31, 1948, was 51,237.

The following schedule indicates the increase in the number of meters in service at the end of December in each year.

1929	711
1930	2,860
1931	7,889
1932	7,875
1933	7,574
1934	7,835
1935	8,219
1936	8,506
1937	8,620
1938	9,183
1939	9,630
1940	10,265
1941	10,394
1942	10,958
1943	11,953
1944	12,989
1945	24,627
1946	28,014
1947	45,087
1948	51,237

During the year 1948 construction was in progress to furnish electrical service to fifty-one towns, villages and hamlets, as follows:

Adanac	Parkbeg
Antler	Paynton
Avonhurst	Phippen
Beverley	Prince
Blumenhof	Redvers
Blumenort	Revenue
Bresaylor	Renown
Broadacres	Rhineland
Calder	Schantzenfeld
Dafoe	Schoenfeld
Delmas	Scott
Edenwold	Secretan
Edgeley	Springfield
Esk	Stewart Valley
Frys	Stornaway
Hagen	Storthoaks
Jansen	Tramping Lake
Kandahar	Valjean
Killaly	Vanguard
Lashburn	Venn
Leinan	Waseca
Maidstone	Wauchope
Manor	Wroxton
Marchwell	Wymark
Marshall	Zelma
Neville	

NEW SERVICES CONNECTED DURING 1948—

New services 6,150

COMPARATIVE STATISTICS—

The Saskatchewan Power Commission, on December 31, 1944,

owned 1,626 miles of transmission lines
serving 146 towns and villages
with 12,989 services (including rural services).

The Saskatchewan Power Commission, together with Dominion Electric Power Limited, on December 31, 1945,

owned 2,486 miles of transmission lines
serving 234 towns and villages
with 24,627 services (including rural services).

The Saskatchewan Power Commission, together with Dominion Electric Power Limited, on December 31, 1946,

owned 2,651 miles of transmission lines
serving 259 towns and villages
with 28,014 services (including rural services).

The Saskatchewan Power Commission, on December 31, 1947,

owned 3,540 miles of transmission lines
serving 343 towns and villages
with 45,087 services (including rural services).

The Saskatchewan Power Commission, on December 31, 1948,

owned 4,190 miles of transmission lines
serving 375 towns and villages
with 51,237 services (including rural services).

ELECTRIC ENERGY STATISTICS—

The following KWH's were generated in Saskatchewan Power Commission plants in:

	1947	1948
Assiniboia	449,790	552,850
Biggar	1,381,471	1,384,552
Canora	703,894	1,396,449
Davidson	28,249	9,658
Eastend	200,490	241,431
Estevan	11,176,470	10,416,800
Grenfell	366,635	626,925
Gull Lake	67,129	39,170
Herbert	228,758	
Hudson Bay	359,359	479,552
Humboldt	904,250	1,054,380
Kerrobert	299,678	382,473
Kindersley	497,395	837,975
Leader	279,560	231,920
Maple Creek	780,510	865,350
Meadow Lake	650,901	818,428
Melville	2,503,490	3,016,850
Moosomin		299,100
Nipawin	379,856	721,230
North Battleford	6,868,766	7,426,491
Perdue	91,818	97,917
Prince Albert	14,826,260	21,578,540
Radville	135,650	
Rosetown	45,240	156,110
Saskatoon	81,382,800	88,469,200
Shaunavon	831,270	970,050
Shellbrook	2,945	3,300
Swift Current	6,772,040	7,402,270
Taylorton	3,038,800	3,595,500
Tisdale	1,243,040	1,015,630
Unity	720,337	1,175,478
Watrous	1,489,660	1,318,255
Wilkie	442,530	409,850
Wynyard	1,962,165	2,462,480
Yorkton	3,918,210	6,215,020
	<u>145,049,416</u>	<u>165,671,184</u>

The following KWH's were purchased by The Saskatchewan Power Commission in:

	1947	1948
Calgary Power Co., Macklin	223,680	231,360
National Light and Power Co.		
Congress System	4,425,600	6,454,208
Riverhurst System	723,641	1,126,116
Mossbank System	297,302	316,261
Fort Qu'Appelle-Lumsden- Weyburn System	3,562,200	5,463,400
City of Regina		
North Annex	402,720	552,136
Qu'Appelle System	5,736,300	7,001,840
City of Weyburn		17,800
	<u>15,371,443</u>	<u>21,163,121</u>
Total KWH's generated and purchased	<u>160,420,859</u>	<u>186,834,305</u>

SASKATCHEWAN POWER COMMISSION CONSTRUCTION OF PLANTS, TRANSMISSION LINES AND DISTRIBUTION SYSTEMS

Construction completed and in progress during the year 1948:

1. ESTEVAN PLANT:

The new \$1,000,000.00 power plant was put into operation during the month of December, 1948. The 80,000 lb. per hour, 450 lb. pressure, 750 degrees temperature steam generator and the new 7,000 H.P. steam turbo generator will greatly facilitate the supply of power in the Bienfait coal fields and the vast area around Estevan.

The ultimate area to be served from the plant will be west to Shaunavon and Eastend, east to the Manitoba border and north to the Canora area.

Orders have been placed for an additional 15,000 KW, 13,800 volt Parsons steam generator complete with condensers, air ejectors and heaters for the new plant, for delivery in 1950.

2. PRINCE ALBERT POWER PLANT:

The installation of a 7,500 KW steam turbo generator has been completed along with an addition to the present building.

A new 140,000 lb., Type VU, steam generating unit, complete with pulverized coal and oil burning equipment, has been delivered and with alterations to the building and boiler foundations the unit should be in operation late in 1949.

3. SASKATOON POWER PLANT:

A new 180,000 lb. two drum, Sterling boiler with return grate spreader stoker, fans, dust collectors and stack, has been ordered for delivery in 1950 and a Nuveyor ash conveyor and extension to the coal bunkers and coal conveyor. This new unit should be in operation late in 1950.

A new Buell (Van Tongeren) fly ash recovery system is being installed on the No. 3 boiler.

Extensions are being made to metalclad switchgear and install a bus tie breaker along with three transfer switches and two access compartments.

4. UNITY POWER PLANT:

Two 875 H.P. Clark gas generating units were installed and the power house extended during 1948. With the addition of these two units, power is now transmitted from Unity to Wilkie, Kerrobert, Kindersley and the Luseland system.

5. MOOSOMIN POWER PLANT:

Two 875 H.P. Busch Sulzer units were installed and were put into operation during 1948. This plant is tied in with the Grenfell-Regina system.

6. WYMARK-NEVILLE:

Twenty-three miles of single phase 8 KV line was constructed to serve Wymark, Neville, Blumenort, Blumenhof, Schantzenfeld, Schoenfeld, Springfield and distribution system completed in each point along with a substation at the Neville corner.

7. NORTH BATTLEFORD-MARSHALL:

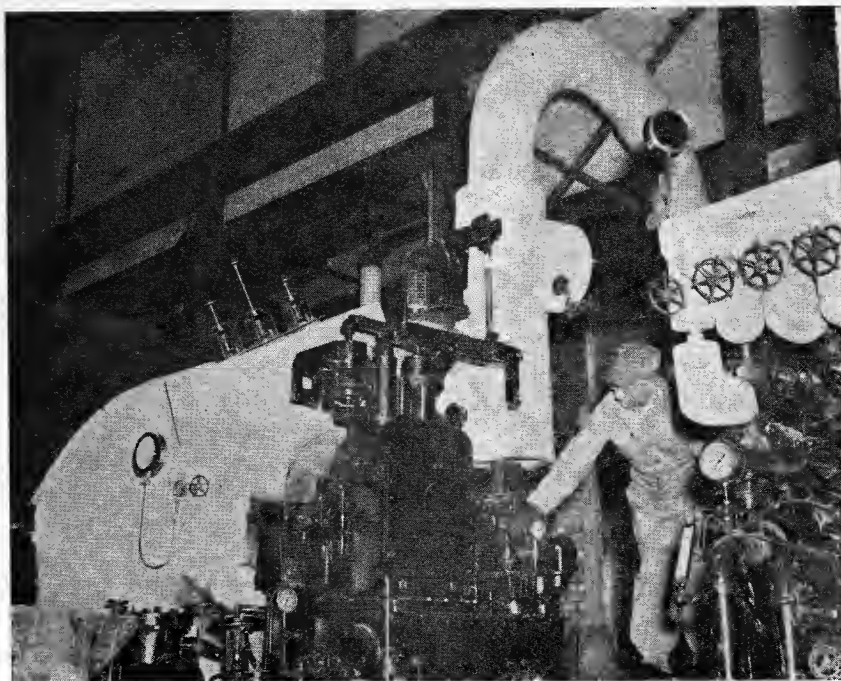

Eighty-four miles of 24 KV line was completed from Hamlin Airport to Marshall and distribution system built to serve Prince, Delmas, Bresaylor, Paynton, Maidstone, Waseca, Lashburn and Marshall.

8. HAGEN:

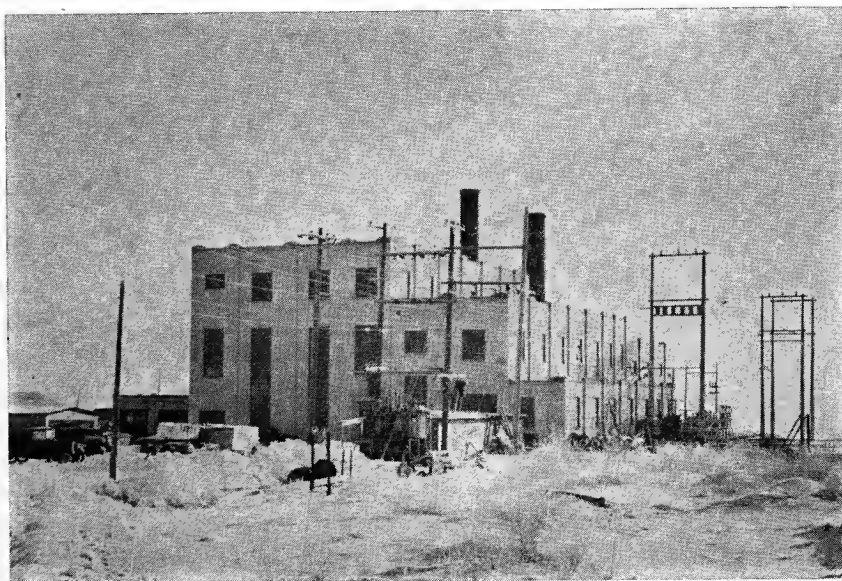

Nine miles of single phase 13.8 KV line and distribution system was built to serve Hagen and rural services.

9. BEVERLEY:

One and one-half miles of single phase 13.8 KV line and distribution system was built to serve Beverley and rural services.

NEW 5000 KW. TURBO-GENERATING UNIT, ESTEVAN, SASK.

NEW POWER PLANT, ESTEVAN, SASK.

10. REGINA:

Construction of one and one-quarter miles of line was completed to serve the Saskatchewan Legislative Building, Regina.

11. UNITY-KINDERSLEY-LUSELAND:

Construction of one hundred and thirty-four miles of 3-phase 24 KV line was completed linking Wilkie, Scott, Kerrobert, Kindersley and Luse land system with Unity. This important link now eliminates the diesel plants at Wilkie and Kerrobert and the purchasing of power from the Calgary Power Company at Macklin. The Kindersley plant will be maintained for the present.

With the completion of this line the following points were energized: Adanac, Phippen, Revenue, Tramping Lake, Broadacres and Scott.

Stepdown transformers and substation were built at Wilkie, Scott and Kerrobert of a total capacity of 675 KVA.

12. EDENWOLD-AVONHURST-EDGELEY:

Construction was started on the 13,800 volt line from Balgonie to Edenwold and east to Edgeley taking in twenty-eight rural services in the area adjacent to the line.

13. WATROUS AREA:

Nineteen and one-half miles of 13.8 KV line are being constructed to serve Zelma, Renown, Venn and Cymric, and distribution systems to serve residents in each village.

14. LANGENBURG-MARCHWELL:

Construction of a 13.8 KV line was completed to serve the Village of Marchwell.

15. DAFOE-WYNYARD:

Fifty-two miles of 3-phase 24 KV line was built to link Dafoe Airport to Wynyard and Lanigan and the Villages of Jansen, Dafoe, Esk and Kandahar will be served from this line.

16. CARLYLE-REDVERS:

Twenty-eight miles of 3-phase 24 KV line was built from Carlyle to Redvers and the Villages of Manor, Wauchope and Redvers were energized. The line will be continued on to Antler and south to Frys and Storthoaks early in 1949.

17. STOUGHTON-YORKTON:

Construction was started on the new 69 KV transmission line from Neudorf to Melville and Yorkton. In early 1949 the last portion of the line from Stoughton to Grenfell will be constructed and will link Yorkton with the Estevan plant.

18. VANGUARD:

Fifteen miles of 8 KV line was built from Aneroid to Vanguard along with the distribution system at Vanguard.

19. MOOSE JAW-CHAPLIN:

Construction was completed on a 34.5 KV line from Moose Jaw to Chaplin connecting with the Chaplin-Swift Current line and Parkbeg, Valjean and Secretan were energized in January 1949.

20. SASKATOON SUBSTATIONS:

Due to the overloading of the 13.8 KV feeders going out from the plant and the transformers at the substation at the City limits caused by increase in load from the University, Airport, Radio Beam Station, and Radio Station CFQC, new feeders had to be installed and additional transformer capacity made available.

Due to the runways being extended at the Airport the line running north out of the City had to be re-routed.

3,200 feet of underground cable and 6,000 feet of overhead cable was erected between the power plant and the City limits. The two existing lines were increased in capacity by increasing the size of copper cable.

A separate circuit was built from the plant to the University.

Erection of the steel and bus work for the substation has been completed and three 1,250 KVA 13.8/24 KV transformers installed.

A double circuit from the substation to a point sixteen miles north of the existing line has been completed giving separate feeders to Humboldt and North Battleford.

The Airport, Radio Beam Station, Radio Station CFQC and Montgomery Place have been cut over to a local feeder out of Saskatoon.

Three oil circuit breakers are to be installed and the substation with control cable back to the plant should be in operation early in 1949.

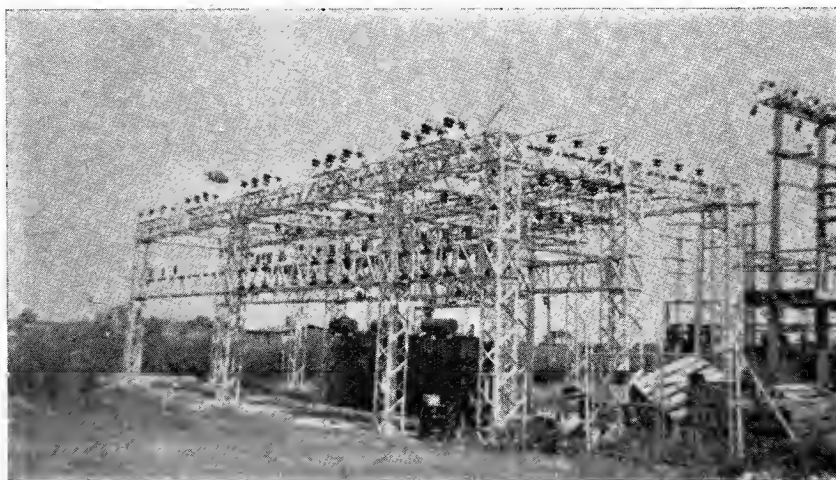

The rate reduction made on June 1st, 1948, enabled the Commission to secure complete uniformity of rate schedules for similar towns throughout the Province. Street lighting schedules were standardized and rates to rural customers were reduced along with other rates so that the maximum for any electrical energy sold by the Commission was lowered to eight cents per kilowatt hour.

The Commission is indebted to its Department Heads, supervisory staff and all other employees for the full co-operation given during a period when winter storms with unfavorable road conditions and a heavy summer construction schedule made it imperative that all employees exercise initiative and the fullest co-operation to the end that a high standard of service was maintained and an extensive construction programme completed adding 6,150 new customers to the lines of the Commission.

Respectfully submitted,

H. F. BERRY,

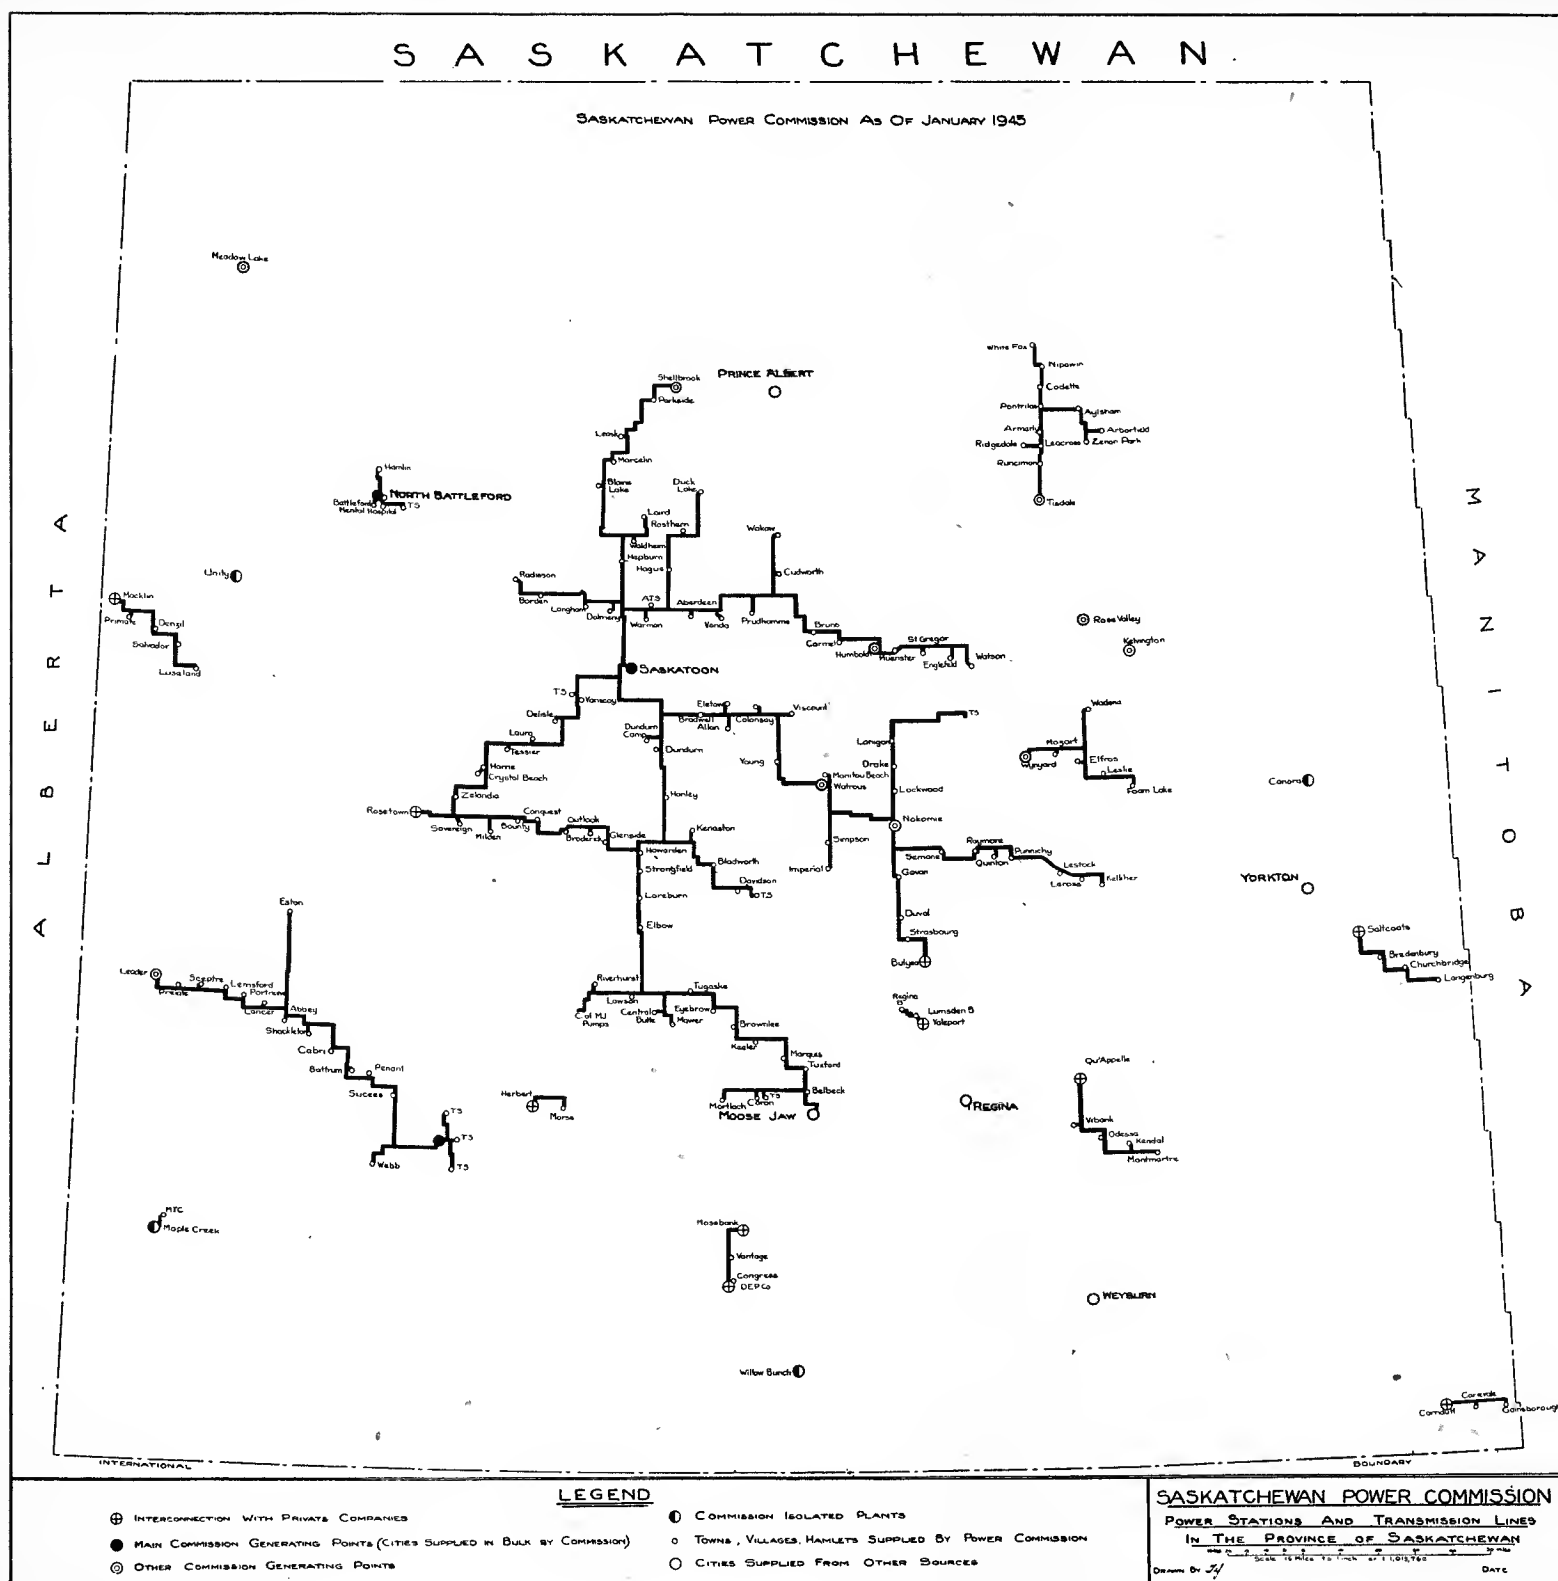

Chairman.

NEW 5000 KVA. SUBSTATION, SASKATOON, SASK.

AUDITOR'S REPORT

REGINA, Saskatchewan,

January 31, 1949.

In accordance with Treasury Board Regulations, an audit of the accounts of the Saskatchewan Power Commission has been made under my direction for the year ended December 31, 1948. All the information and explanations required by me have been obtained.

Cash on hand has been verified with subsequent bank deposits and bank balances by certificates from the depositaries. Sinking Fund Investments held by the Trustees and Investments held in Operating Account have been verified by certified statements furnished by the custodian, the Royal Bank of Canada, Regina. Investments held in City Sinking Funds, in which the Commission has an interest, have been verified from statements furnished by officials of the cities concerned. A bank balance of \$92.50 is held by the Canadian Bank of Commerce, Montreal, at December 31, 1948, to cover payment of outstanding debenture coupons of the Dominion Electric Power Limited (dissolved).

Head Office Administration Salaries and Expenses for the current year, particulars of which are incorporated in a statement submitted herewith, have been allocated by the Commission as follows:

To Capital—amount charged to cover cost of Engineering and
Superintendence on construction projects.....\$ 94,053.39

To Operation—amount charged to Operating Accounts to cover
Administration costs on all plants and systems.....\$ 207,255.94

Full provision has been made for interest on capital advances, debentures assumed, and other obligations of the Commission, as well as for depreciation and replacement reserves for the current year.

Capital and Operating Stores have increased during the year by \$345,464.85. The stores inventories are based upon perpetual inventory records priced on a cost basis. The inventory records were checked during the year by officials of the Commission against the physical inventories. An examination was made during the year of the Stores Control records with the detailed stores- ledger records, and tests made of plant and field stores. The year-end inventories have been verified by certificate from responsible officials.

Subject to the foregoing remarks, I report that in my opinion, the attached Balance Sheet and Operating Statements are properly drawn up so as to show a true and correct view of the state of the financial affairs of the Saskatchewan Power Commission as at December 31, 1948, and the result of operations for the year ended on that date, according to the best of my information, the explanations given to me and as shown by the books of account.

C. H. SMITH, C.A.,

Auditor of Utilities.
